

**Prevent wildfires.
Provide safe drinking water.
Protect California.**

Central Valley Area Fact Sheet

Unpredictable cycles of drought and flooding, devastating wildfires, and extreme heat waves make front-page news almost daily.

Proposition 4 represents a historic shift from response to prevention, saving us billions of dollars more in damages and saving lives by investing in proven solutions to:

- **Prevent devastating wildfires** and smoke.
- **Provide safe, reliable drinking water** while boosting supplies.
- **Protect California's iconic forests**, mountains, rivers, and coast.
- **Ensure all Californians** have access to clean water and healthy, resilient communities.

Specific Central Valley Allocations

\$150 million for projects to improve existing levees and protect Delta farmland from flooding and major agricultural and urban water supplies from saltwater contamination in the Sacramento-San Joaquin Delta.

\$29 million for the Delta Conservancy to restore the Delta's ecosystem and advance the Delta communities economic well-being.

\$11 million for the San Joaquin River Conservancy for climate resilience benefits.

Statewide Allocations Will Also Benefit Central Valley Communities

\$1.5 billion for projects that reduce the risk of wildfires and health-harming wildfire smoke near communities, increase wildfire suppression capacity, and integrate regional fire prevention activities.

\$870 million for projects that protect and restore fish and wildlife habitat and contribute to the state's biodiversity, public access, and conservation goals

\$610 million for Safe Drinking Water, Clean Water, and removal of toxic substances from water supplies

\$450 million to increase resilience of low-income communities to the impacts of climate change by funding cooling and clean air centers, emergency shelters, shade and urban green infrastructure to reduce exposure to extreme heat.

\$400 million for flood control projects.

\$386.25 million for groundwater storage projects including SGMA implementation.

\$200 million for the creation, expansion, and renovation of safe neighborhood parks in park-poor neighborhoods.

\$200 million for land-repurposing projects.

\$200 million for the reduction of climate impacts on disadvantaged communities and vulnerable populations and the creation, protection, improvement and expansion of outdoor parks and open-space lands.

\$175 million to improve forest health.

\$150 million for Transformative Climate Communities to help increase the health, climate resiliency, and prosperity of disadvantaged communities.

\$135 million for grants to local agencies to help leverage federal funds to reduce wildfire risks, improve emergency notification and response systems, and further help communities become more resilient to the impacts of climate change.

\$105 million to improve climate resilience on agricultural lands.

\$100 million for community resilience centers.

\$90 million for socially disadvantaged farmers.

\$75 million for water storage projects.

\$75 million for regional water conveyance projects.

\$75 million for water conservation.

\$65 million for healthy soils.

\$50 million for the California Conservation Corps and for local corps to implement wildfire prevention, flood control, and habitat improvement projects in the North State.

\$40 million for water efficiency/conservation.

\$20 million for invasive species control.

Other allocations to help reduce risks and impacts from wildfires, floods, sea level rise, droughts, and to increase community resilience to climate change.
